PROFESSIONAL EXPERIENCE

Gemware | Software Engineer | Vlaardingen, The Netherlands

July 2020 - Future
March 2019 – January 2020

- Added a fully customizable analytics dashboard to the Whenride SaaS to give more insight to the customers.
- Updated the customer app for Whenride with a live view of the driver's location to minimize support calls and increase clarity.
- Redid the driver app for Whenride with Flutter where drivers can schedule themselves according to their availability, see their upcoming rides and navigate these rides.

Gemware | Intern Software Engineer | Vlaardingen, The Netherlands

January 2020 – July 2020

- Created the whenride.com website.
- Added the ability to use 45km/h cars on Whenride.
- Added the ability to define specific zones for the cars on Whenride.

Gravilux | Intern Web Developer | Vlaardingen, The Netherlands

September 2018 – January 2019

- Created custom WordPress plugins and themes for several happy clients.

EDUCATION

Bachelor of Science in IT, Hogeschool Rotterdam
Only class on Mondays

2020 - 2024

MBO4 Application and Media Development, Techniek College Rotterdam

2017 - 2020

Anglia C2 Masters English

2017

PROJECTS | [More on github.com/laytan](https://github.com/laytan)

Featured Channels Feed | featured-channels-feed.laytanlaats.com | github.com/laytan/featured-channels-feed

2020

All Featured YouTube channels in one place - A feed of the latest videos of the featured channels from a selected channel. I used the project to learn more about Docker, web scraping and Golang.

Shortnr | shortnr.laytanlaats.com | github.com/laytan/shortnr

2020

A link shortener created using VueJS, a Golang back-end and a MySQL database. I used the project to learn JWT authentication, using PWA (Progressive web app) technologies and testing (almost 100% coverage).

Crazy Dutch Bikers | crazydutchbikers.nl | github.com/laytan/crazy-dutch-bikers

2019

A Laravel PHP and a little bit of VueJS website with a custom CMS. Includes testing, file upload, auth and mailing.

Get of that Island | laytanl.itch.io/get-of-that-damn-island | github.com/laytan/Get-of-that-damn-island-LD-42

2018

A 2D puzzle game made with Unity and C# in 48 hours.
